MaidPro

Franchise Decision Report

Source: 2025 FDD filed with Wisconsin DFI · Filing year: 2025
Legal entity: MaidPro Franchise, LLC
Report generated: 2026-03-31 · Franchise Decision Radar

Executive Summary

MaidPro is a 29-year-old residential cleaning franchise (MaidPro Franchise, LLC / Threshold Brands / The Riverside Company) with 237 outlets as of year-end 2024. The system has stabilized after modest contraction: 246 to 241 to 237 to 237 over three years, with net zero change in 2024. Turnover has improved significantly — 15.0% to 12.4% to 8.4% — the strongest improving-turnover trend in the cohort alongside The Maids.

MaidPro has the simplest fee structure in the residential cleaning cohort: 6% flat royalty, 2% Brand Fund, $500/month technology fee. No mandatory local marketing percentage, no DHH-based fees, no contact center surcharges, no escalating weekly minimums. At $300K revenue, total fees are $30,000 (10.0%) — the lowest fully-transparent burden in the cohort (The Cleaning Authority models lower at 7.6%, but its DHH-based Local Marketing Fee is excluded — see that report for details). At $500K, fees are $46,000 (9.2%). The simplicity is itself a competitive advantage: you can model your economics without hidden fee layers or territory-size-dependent variables.

The Item 19 discloses total gross revenue by quartile for 231 outlets: system average $461,941, median $397,548. The dispersion is wide (Q1 average $958K vs Q4 average $134K), and only 42% of outlets exceed the average — a top-heavy distribution. No cost data is disclosed. The franchise offers a Franchise Option Program ($0 franchise fee in exchange for 10% royalty for 10 years) and a Conversion Program (2% royalty for first 2 years), creating distinct fee tiers within the system.

Decision Scorecard

Quick-read assessment across key buyer decision dimensions. Ratings reflect this brand's position relative to the residential cleaning cohort.

DIMENSION	RATING	SUMMARY
Entry cost burden	**MIXED**	$110K–$159K total investment. Mid-cohort. $45K franchise fee with military (20%), multi-unit (25%), and conversion (full waiver) discounts available.
Ongoing fee burden	**STRONG**	Lowest fully-transparent fee burden in cohort (TCA models lower but excludes its DHH-based Local Marketing Fee). 10.0% at $300K, 9.2% at $500K. Simplest structure — no hidden layers.
System stability	**MIXED**	Stabilized at 237 units after modest contraction (-9 over 3 years, -3.7%). Turnover improving: 15.0%→12.4%→8.4%. Net zero change in 2024 is a positive inflection.
Revenue disclosure	**STRONG**	Total gross revenue by quartile for 231 outlets. System average $462K, median $398K. Clear, comparable data.
Disclosure quality	**MIXED**	Table 1 has a typographical error (mislabeled year). Territory definition changed in 2023 (~45K QH at $100K+ income). Confidentiality clauses present. 7 closures excluded.
Downside risk profile	**MIXED**	Wide revenue dispersion (Q1 7.1× Q4). Bottom quartile average of $134K may not support fee obligations. Franchise Option Program creates 10% royalty cohort within system.
Buyer fit breadth	**STRONG**	Lowest fully-modelable fee burden and simplest structure in cohort. Multiple entry paths (standard, conversion, franchise option). Works for budget-sensitive and control-oriented buyers.
Overall	**FAVORABLE**	The cleanest fee structure and lowest fully-modelable ongoing cost in the cohort, paired with disclosed revenue and a stabilizing system. The trade-off is less franchisor-managed marketing infrastructure and a smaller system than legacy competitors. Relative cohort position does not establish absolute profitability.

OVERALL POSTURE

MaidPro is the simplest franchise in this cohort to model: flat 6% royalty, 2% brand fund, $500/month tech fee, and that's it. No DHH-based marketing fees, no contact center surcharges, no escalating weekly minimums. You can calculate your total franchisor obligation in 30 seconds. The fee advantage is real — $29K/year less than The Maids and $35K/year less than Two Maids at $300K revenue. The trade-off: MaidPro's marketing infrastructure is thinner than brands that charge for managed local advertising, and the system is smaller. You are paying less but getting less franchisor-directed marketing support. If you want to control your own marketing spend and keep more of what you earn, MaidPro is the cohort's strongest argument for that approach.

Buyer-Fit Profile

Best fit for

- **Cost-conscious buyer who wants to keep more revenue:** MaidPro retains the most revenue for the franchisee at every modeled level. At $500K, you keep $454K after franchisor fees. At Two Maids, you'd keep $419K. That $35K/year gap compounds.
- **Marketing-independent operator:** No mandatory franchisor-managed local advertising program. The $3,000/month local ad minimum for the first 24 months is a spend requirement, not a payment to the franchisor. You choose where and how to advertise.
- **Conversion franchise buyer:** The Conversion Program waives the franchise fee entirely and reduces royalty to 2% for the first 2 years. If you already run a cleaning business, this is the lowest-friction entry in the cohort.
- **Buyer who values fee transparency:** Every fee is predictable and calculable. No territory-size-dependent marketing costs, no contact center escalators, no discretionary royalty adjustments.

Weaker fit for

- **Buyer who wants franchisor-managed marketing:** MaidPro does not run your local advertising for you. The optional TMS Connect Internet Presence service is $90/month, SEO is $305/month — but these are opt-in, not managed programs. If you want the franchisor to handle lead generation, Two Maids or The Cleaning Authority offer more managed infrastructure (at higher cost).
- **Buyer seeking large-system brand recognition:** 237 outlets is smaller than Molly Maid (448), Merry Maids (802), or The Maids (369). If national brand awareness is a priority, larger systems offer more. MaidPro's recognition is regional, not national.
- **Risk-averse buyer focused on bottom-quartile outcomes:** Q4 average revenue is $134K with a low of $14,440. At that level, franchisor fees ($22K/year) consume 16% of gross revenue before any operating costs. The bottom quartile of MaidPro is not viable as a standalone business.

Proceed only if

- You are comfortable managing your own local marketing. The fee savings versus managed-marketing brands assume you can generate leads efficiently on your own or through the optional MaidPro tools.
- You have evaluated whether the Franchise Option Program (10% royalty for 10 years) or the standard program (6% royalty, $45K fee) is better for your cash flow profile. At $400K revenue, the crossover is ~7.5 years — after that, the standard program saves money.

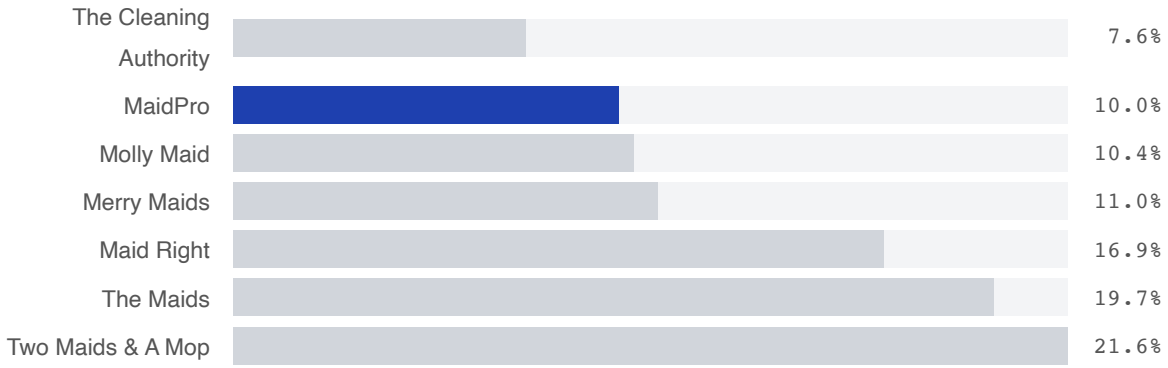
- You understand that territory definitions changed in January 2023 (~45K QH at $100K+ income), which means historical performance data from pre-2023 territories may not be comparable to current offerings.

Fee Burden Analysis

MaidPro has the lowest fully-transparent ongoing fee burden in the residential cleaning cohort at every modeled revenue level: 11.0% at $200K, 10.0% at $300K, 9.5% at $400K, 9.2% at $500K. The gap versus competitors is significant — $29,130/year less than The Maids and $34,800/year less than Two Maids at $300K. The primary reason: no mandatory local marketing program payable to the franchisor. MaidPro charges a flat 2% Brand Fund and leaves local marketing to the franchisee.

AT REVENUE	ROYALTY	MARKETING	TECH / OTHER	TOTAL	% OF REV	COHORT RANK
$200,000	$12,000	$4,000	$6,000	**$22,000**	11.0%	2/7
$300,000	$18,000	$6,000	$6,000	**$30,000**	10.0%	2/7
$400,000	$24,000	$8,000	$6,000	**$38,000**	9.5%	2/7
$500,000	$30,000	$10,000	$6,000	**$46,000**	9.2%	2/7

Cohort fee burden at $300K revenue



Total annual franchisor fees as a percentage of $300K gross revenue. Includes royalty, marketing, technology, and all mandatory recurring fees.

Component breakdown

- **Royalty (6% flat):** Simplest royalty in the cohort. No tiers, no brackets, no discretionary incentives, no resets. 6% of monthly Gross Consumer Sales. Minimum Royalty of $800/month applies after 12 months if sales fall below $15,000/month. Premium Royalty of 2.5% on out-of-territory customers (with franchisor permission). (pp. 10, 13–14)

- **Brand Fund (2% flat):** Monthly. Straightforward. No additional local marketing percentage to the franchisor. The mandatory $3,000/month local advertising spend for the first 24 months is a franchisee- directed requirement, not a payment to the franchisor. (pp. 10, 14)
- **Technology ($500/month):** Covers proprietary cloud-based software (4 licenses), branded email (4 licenses), MACS marketing tool, and 1-800 customer service number. Waived for second and subsequent MaidPro franchises. May increase up to 10% per year compounding. (pp. 12–14, 16)

> **What this means:** At $300K revenue, you retain ~$270K after franchisor fees. At Merry Maids (next comparable): ~$267K. At The Maids: ~$241K. At Two Maids: ~$235K. The MaidPro advantage is modest vs Merry Maids and Molly Maid but dramatic vs The Maids and Two Maids. Over a 10-year term at $300K revenue, the cumulative fee difference vs The Maids is $291,300. That is real money.

TWO HIDDEN FEE STRUCTURES WITHIN THE SYSTEM

MaidPro has two alternative fee programs that create different cost profiles for different operators: (1) Franchise Option Program: $0 franchise fee but 10% royalty for 10 years (vs standard 6%). At $400K revenue, the annual cost difference is $16,000/year — the $45K franchise fee is recovered in under 3 years. After Year 3, the standard program saves money every year. (2) Conversion Program: franchise fee waived, 2% royalty for first 2 years. These operators are included in the Item 19 data — their economics differ from standard franchisees. (pp. 8–9)

Item 19 Interpretation

MaidPro's Item 19 discloses total Gross Consumer Sales and number of jobs for 231 franchised outlets open the full calendar year 2024. It is straightforward and comparable — a single table with system-wide and quartile breakdowns, plus a separate section for operators reporting from two combined territories.

System-wide performance

- **Average Gross Consumer Sales:** $461,941. Median: $397,548.
- **Range:** $14,440 to $2,815,974. Extremely wide.
- **42% at or above average** — top-heavy distribution driven by high performers.
- **Average jobs:** 2,644. Implied average revenue per job: ~$175.

By quartile

- **Q1 (53 outlets):** Average $958,412, median $891,162. Range: $659K–$2.82M.
- **Q2 (53 outlets):** Average $520,615, median $515,502. Range: $415K–$653K.
- **Q3 (53 outlets):** Average $312,844, median $318,560. Range: $225K–$406K.
- **Q4 (52 outlets):** Average $134,476, median $139,439. Range: $14K–$222K.

What this tells you

- The Q1-to-Q4 ratio is 7.1:1 ($958K vs $134K). This is among the widest dispersions in the cohort.
- Q2 and Q3 are relatively tight ($313K–$521K) — suggesting a "middle band" of $300K–$500K as the realistic range for an established single-territory operator.
- Q4 includes outlets generating as little as $14K — some may be part-time, winding down, or in the Conversion/Franchise Option Program with different operating profiles.

What's missing

- **Any cost data:** No COGS, no gross margin, no expense breakdown. Cannot assess profitability from the FDD alone.
- **Revenue by territory age/tenure:** Unlike The Cleaning Authority or Two Maids, MaidPro does not break out revenue by how long the territory has been operating. You cannot see the ramp curve.
- **Survivorship bias:** 7 outlets that permanently closed in 2024 are excluded. 6 that opened during 2024 (not full year) are also excluded. Smaller exclusion count than Merry Maids (90)

or Molly Maid (25).

From gross revenue to owner economics

MaidPro does not disclose costs. Using industry-norm estimates:

At the system median ($398K):

- Franchisor fees at 10%: ~$40K
- Revenue after fees: ~$358K
- Estimated COGS at 55% (cleaning industry norm): ~$219K
- Remaining for overhead and owner draw: ~$139K
- After overhead (rent $12K–$18K, insurance $4K–$8K, vehicle $5K–$8K, local marketing $18K–$36K, misc $4K–$6K): ~$63K–$96K for owner income before taxes

At Q3 average ($313K):

- Franchisor fees: ~$31K. Revenue after fees: ~$282K.
- COGS at 55%: ~$172K. Remaining: ~$110K.
- After overhead ($43K–$76K): ~$34K–$67K for owner income.

> **What this means:** MaidPro's fee advantage translates to approximately $5K–$15K more in annual owner income compared to mid-range competitors at the same revenue level. The advantage grows at lower revenue levels where MaidPro's lack of fixed-dollar marketing fees (no $30K/year local marketing program) matters most. At $300K, the fee difference vs The Maids is $29K — potentially the difference between a viable and an unviable business.

> **THE $3,000/MONTH LOCAL MARKETING QUESTION**
>
> MaidPro requires $3,000/month in local advertising for the first 24 months — $72,000 over two years. This is a spend requirement, not a fee to the franchisor. After 24 months, the Manuals govern the spend amount (not disclosed). The critical question for your model: what is the required local marketing spend after Month 24? If it drops to $1,000/month, your Year 3+ costs improve materially. If it remains at $3,000/month, MaidPro's true ongoing cost is closer to competitors than the modelable fees suggest.

Buyer-Side Economics Reality Check

Important framing: This is not a profitability forecast. It uses MaidPro's disclosed Item 19 revenue data (231 outlets, calendar year 2024). No cost data is disclosed — COGS and overhead are estimated from industry norms. Conversion franchisees (2% royalty) and Franchise Option Program participants (10% royalty) are included in the revenue data — their economics differ from standard 6% franchisees. Your actual results depend on your territory, labor market, marketing effectiveness, and operating model.

SCENARIO	REVENUE	FRANCHISOR FEES	EST. COGS	REMAINING
Q4 average	$134,000	$14,740 (11.0%)	$73,700	**$45,560**
Q3 average	$313,000	$31,040 (9.9%)	$172,150	**$109,810**
System median	$398,000	$37,840 (9.5%)	$218,900	**$141,260**

Revenue from Item 19 quartile data (CY2024, 231 outlets). COGS estimated at 55% (cleaning industry norm — not disclosed by MaidPro). Franchisor fees at standard 6% royalty + 2% Brand Fund + $500/mo tech = varies by revenue level. 'Remaining' must cover local marketing (minimum $3,000/month for first 24 months), overhead, taxes, and owner draw. Q4 scenario may include part-time, winding-down, or alternative-fee-program operators.

Investment Breakdown

Mid-cohort entry cost: $109,860–$158,650. The $45,000 franchise fee is competitive (below Merry Maids' $55K, The Maids' $60K, and Molly Maid's $60K–$85K combined fees). Multiple programs reduce or eliminate the fee: Military/First Responder (20% off first franchise), Multi-Unit (25% off 2nd+ if 3+ purchased simultaneously), Conversion (full waiver), Franchise Option ($0 fee, 10% royalty for 10 years). (pp. 8–9)

CATEGORY	LOW	HIGH
Initial Franchise Fee	$45,000	$45,000
Travel and Living Expenses while Training	$3,800	$7,000
Equipment	$7,500	$8,500
Miscellaneous Opening Costs	$6,160	$8,850
Cost for Initial Vehicle with Wrap	$5,300	$28,000
Initial Printing Materials	$1,300	$1,300
Advertising - Initial 3 Months	$15,000	$15,000
Real Estate	$5,000	$10,000
Insurance	$2,000	$12,000
Additional Funds - 3 Months	$18,800	$23,000
Total	**$109,860**	**$158,650**

What to know about the major line items

- **Franchise fee ($45,000):** Due at signing, nonrefundable. Training for 2 included. The Franchise Option Program refunds this fee at opening in exchange for 10% royalty (vs 6%) for 10 years — a meaningful cash-flow alternative for capital-constrained buyers. (pp. 8–9)
- **Advertising — Initial 3 months ($15,000):** Mandatory $3,000/month local advertising for first 24 months. Item 7 captures only the first 3 months ($15,000). Total first-year local ad cost: $36,000. Total 24-month commitment: $72,000. This is the largest ongoing cost commitment and is separate from franchisor fees. (p. 17)
- **Cost for initial vehicle with wrap ($5,300–$28,000):** Widest range of any line item. Low is lease/financed used vehicle; high is new vehicle purchase. Must display MaidPro car

wrap. (p. 17)

- **Additional Funds — 3 months ($18,800–$23,000):** Includes payroll, insurance, professional fees, monthly Technology Fee. Does not include owner salary. (p. 17)
- **Insurance ($2,000–$12,000):** Varies widely by state, payroll, and employee count. Workers' comp and third-party bonding ($25K per loss) required. (pp. 17–19)

> **What this means:** Plan for ~$134K at the midpoint. The Franchise Option Program ($0 fee) reduces cash-at-signing by $45K but increases ongoing costs by $16K/year at $400K revenue ($40K vs $24K royalty). The crossover point where the standard program becomes cheaper is approximately Year 2.8 at $400K revenue. Most buyers who can afford the $45K fee upfront should pay it — the 10-year commitment to 10% royalty is a steep long-term cost.

System Health

MaidPro's system is stabilizing after modest contraction. Unit count declined from 246 to 237 over three years (-3.7%), but 2024 showed net zero change — the first year without net losses. Turnover has improved significantly: 15.0% (2022) to 12.4% (2023) to 8.4% (2024). The trajectory is positive. Terminations dropped from 13 to 9 to 4 over the period. Only 7 outlets permanently closed in 2024 — the lowest exit count in the cohort relative to system size.

YEAR	OPENED	CLOSED	NET	END COUNT
2022	19	24	−5	241
2023	12	16	−4	237
2024	7	7	+0	237

Modest, stabilizing system

- **2022:** 19 opened, 13 terminated, 11 ceased, 13 transferred. Net: -5.
- **2023:** 12 opened, 9 terminated, 6 ceased, 1 non-renewal, 14 transferred. Net: -4.
- **2024:** 7 opened, 4 terminated, 3 ceased, 13 transferred. Net: 0.

The key trend: exits are declining (37 → 30 → 20) while new openings have slowed (19 → 12 → 7). The system reached equilibrium in 2024 — not through growth, but through reduced churn. (pp. 40–46)

Active transfer market

13 transfers per year across the period — consistent and substantial relative to the 237-unit system (5.5% transfer rate). This suggests territories have resale value and an established ownership turnover mechanism. The $5,000 flat transfer fee is the lowest in the cohort — significantly below Molly Maid ($15,000), The Maids ($15,000), and Two Maids ($25K–$50K). Low transfer friction is a positive signal for exit optionality.

Projected growth

4 new outlets projected (CO, CT, FL ×2), plus 2 signed-but-not-opened (IL, OH). Modest pipeline but consistent with a system that is not aggressively expanding. (pp. 45–46)

> **What this means:** MaidPro is not a growth story. It is a stability story. The system found its floor in 2024 at 237 units. Turnover is dropping. The $5,000 transfer fee means exits are low-friction. For a buyer, the relevant question is whether 237 units is a stable base or a pause before further decline. The turnover trajectory (15% → 8.4%) strongly favors the stable-base interpretation.

No company-owned outlets

Zero company-owned locations. All 237 outlets are franchised. The franchisor is not competing with its franchisees. (pp. 40–46)

Risk Signals

Revenue dispersion is the primary economic risk

The 7.1:1 ratio between Q1 ($958K) and Q4 ($134K) average revenue means outcomes vary enormously. Q4's average of $134K — with a low of $14K — represents a cohort of operators for whom the franchise is not working as a full-time business. At $134K revenue, franchisor fees ($22K), estimated COGS ($74K), and basic overhead ($30K+) leave effectively nothing for owner income. The question is whether Q4 territories are failing due to market conditions, operator execution, or structural issues with certain territory types. (pp. 38–40)

Territory definition change

In January 2023, MaidPro changed its territory definition to ~45,000 Qualified Households with $100K+ household income (previously 20K–80K QH with $75K+ income). This means territories sold before 2023 may be structurally different from current offerings. Older territories could be significantly smaller or in lower-income markets. The Item 19 data includes all 231 outlets regardless of territory definition — historical territories may drag averages. (pp. 38, 40)

Franchise Option Program creates a split system

Operators who chose the Franchise Option Program ($0 fee, 10% royalty for 10 years) pay 67% more in royalties than standard operators at the same revenue level. They are included in the Item 19 revenue data but their cost structure is materially different. A buyer comparing themselves to the system average must account for the fact that some peers are paying 6% royalty and others are paying 10%. (pp. 8–9)

Litigation: effectively clean

Single disclosed arbitration — MaidPro vs former franchisee for unpaid fees and non-compete violation. Settled within 3 months (June 2024). No pending matters. No regulatory actions. This is the lightest litigation profile in the cohort. (p. 8)

Independent franchisee association

Maid Together Franchisee Association Inc. exists as an independent organization. Independent franchisee associations sometimes form in response to franchisor-franchisee tensions. The FDD does not provide details on the association's membership or concerns. Ask about its role during your diligence.

Confidentiality clauses

Current and former franchisees have signed provisions restricting their ability to speak openly — a due diligence obstacle consistent across several brands in this cohort.

Peer Context

MaidPro has the simplest and lowest fully-modelable fee structure in the residential cleaning cohort. It offers fee transparency that no competitor matches, disclosed revenue data, a stabilizing system, and the lowest transfer fee ($5K). It is the anti-complexity choice.

Closest comparison: Molly Maid. Similar fee burden (10.0% vs 10.4% at $300K), similar system trajectory (both stabilizing after contraction). Molly Maid has more brand recognition and Neighborly infrastructure but does not disclose total revenue. MaidPro discloses revenue and has simpler fees. Molly Maid offers the bigger brand name; MaidPro offers more transparency and simplicity.

Sharpest contrast: The Maids. The Maids charges $59,130 at $300K vs MaidPro's $30,000 — nearly double. The Maids provides a company-owned P&L (15.5% net margin) that MaidPro cannot match. The question: is The Maids' profitability data worth $29K/year more in fees? For an analytical buyer who values data, possibly. For a cost-conscious buyer, MaidPro's fee advantage is transformative.

Growth alternative: Two Maids & A Mop. If you want a franchise that is growing rapidly and provides franchisor-managed marketing, Two Maids is the opposite end of the spectrum. You pay 21.6% of revenue at $300K (vs MaidPro's 10.0%) but get managed advertising, richer disclosure, and system momentum. MaidPro is the DIY bet; Two Maids is the managed bet.

METRIC	MAID RIGHT	MAIDPRO	MERRY MAIDS	MOLLY MAID	THE CLEANING AUTHORITY	THE MAIDS	TW MAIDS A MC
System size	35	237	802	448	233	338	1
Investment range	$147K–$218K	$109K–$158K	$126K–$170K	$139K–$197K	$92K–$147K	$117K–$141K	$93 $14
Fee burden at $300K	$50,780	$30,000	$32,988	$31,056	$22,902	$59,130	$64,8
% of revenue	16.9%	10.0%	11.0%	10.4%	7.6%	19.7%	21.
3-year net growth	+11	−9	−187	−53	+24	−13	+
Recent attrition	34.1%	3.0%	10.2%	5.4%	1.8%	2.9%	5.
Royalty rate	6.0%	6.0%	7.0%	6.5–3.0%	6.0–4.0%	6.9–3.9%	7. 4.

Decision overlay

Lowest modelable fee burden	MaidPro — 10.0% at $300K with the simplest structure in the cohort: flat 6% royalty + 2% Brand Fund + $500/mo tech. No territory-size-dependent fees.
Richest revenue disclosure	The Cleaning Authority — Per-territory gross revenue ($1.46M average Enterprise), COGS breakdown, price per clean, and customer metrics. Most data for financial modeling.
Best profitability disclosure	The Maids — Only brand disclosing company-owned net margin (15.5%). 97 company-owned offices with $1.18M system-wide average.
Strongest growth trajectory	Two Maids — 56.5% system growth over 3 years (+7, +19, +26 net units). Only brand with sustained, accelerating expansion.
Lowest franchise turnover	The Cleaning Authority — 4.1% in 2024, down from 10.6%. Zero terminations in 2024 across 236-outlet system.
Strongest brand recognition	Molly Maid — 448 outlets, franchising since 1980. Longest track record and Neighborly multi-brand ecosystem.
Highest regulatory risk	Maid Right — CEO barred in California, 6 state regulatory actions, 38.6% turnover, financial condition warnings. Smallest system (35 units).

Discovery Day Diligence Script

These questions are derived from specific findings in the MaidPro 2025 FDD. Each includes context on why it matters and what to listen for.

1. The mandatory local advertising spend is $3,000/month for the first 24 months. What is the required spend after Month 24, and who determines it?

Item 6, pp. 14, 17. After 24 months, 'Manuals govern local spend amount' — not specified in FDD.

---

2. Q4 outlets average $134K in revenue with a low of $14K. How many of the 52 Q4 outlets are Franchise Option Program participants (10% royalty), Conversion Program operators (2% royalty), or standard franchisees (6% royalty)?

Item 19, pp. 38–40. Three distinct fee structures coexist in the system. Program participation likely correlates with performance.

---

3. Territory definitions changed in January 2023 to ~45K Qualified Households at $100K+ income. How many of the 231 reporting outlets are on the old territory definition vs the new one?

Item 19 footnotes, pp. 38, 40. Historical territories ranged from 20K–80K QH at $75K+ income.

---

4. The $5,000 transfer fee is the lowest in the cohort. What has been the typical resale price for MaidPro territories that transferred in 2024, expressed as a multiple of trailing 12-month revenue?

Item 20, pp. 40–46. 13 transfers in 2024.

---

5. The Franchise Option Program charges 10% royalty for 10 years in exchange for $0 franchise fee. How many current operators are on this program, and what is their average revenue compared to standard franchisees?

Item 5, pp. 8–9. $45K franchise fee refunded at opening, replaced by 10% royalty.

---

6. The Maid Together Franchisee Association exists as an independent organization. What is the association's current focus, and does the franchisor engage with it on policy decisions?

FDD reference to independent franchisee organization.

Source & Methodology

Source document: MaidPro 2025 Franchise Disclosure Document, filed with the Wisconsin Department of Financial Institutions. 262-page regulator-source PDF. SHA-256:
`6f544315bc684e5494d541f1e0ae768bcc4ebe05ee87e94b4350b10057577102`

Extraction: Structured data extraction using pdfplumber with manual review. Field-level provenance recorded (source year, state, page number, item reference). Extraction confidence: high (3+ fields spot-checked against source).

Fee modeling: Year 5 assumptions, single territory, 1 owner + 1 technician. Revenue distributed evenly across the year. All mandatory fees enforced. See fee_modeling_framework.md for full methodology.

Economics scenarios: Revenue estimates drawn from Item 19 data. COGS ratio is brand-specific (derived from available company-owned P&L data; see Economics section for derivation and assumptions). Scenarios are illustrative, not predictive. Operating costs beyond franchisor fees and COGS are not estimated — the buyer must validate these independently.

Peer comparison: Same methodology applied to all 7 brands in this cohort (Maid Right, MaidPro, Merry Maids, Molly Maid, The Cleaning Authority, The Maids, Two Maids & A Mop). All from 2025 FDDs filed with Wisconsin DFI.

Disclaimer: This report is not legal advice, investment advice, or a recommendation to buy or avoid this franchise. It is a structured analysis of publicly available regulatory filings. The buyer should read the actual FDD, consult a franchise attorney, and conduct their own due diligence before making any investment decision. Economics scenarios are illustrative frameworks for buyer-side thinking — not profitability forecasts.
