Molly Maid

Franchise Decision Report

Source: 2025 FDD filed with Wisconsin DFI · Filing year: 2025
Legal entity: Molly Maid SPV LLC
Report generated: 2026-03-31 · Franchise Decision Radar

Executive Summary

Molly Maid is the largest residential cleaning franchise in this cohort by unit count (448 outlets as of year-end 2024) and the oldest by system age (franchising since 1984). It is backed by Neighborly / KKR through a securitization structure (Molly Maid SPV LLC). The system has contracted every year for three consecutive years — 501 to 448 units, a net loss of 53 (-10.6%). This is not a growing system; it is a mature brand in managed decline.

The fee structure is mid-cohort: a marginal tiered royalty starting at 6.5% (declining to 3% above $2.8M), 2% MAP contribution, and ~$463/month in technology fees. At $300K revenue, total modelable fees are $31,056 (10.4%) — below Merry Maids, The Maids, Two Maids, and Maid Right, but above The Cleaning Authority and MaidPro. However, the Local Marketing Requirement (per-Target-Household, territory-size-dependent) is excluded from the model and adds an unknown additional cost.

The Item 19 is unusual: it discloses per-cleaning revenue ($173 average), per-Target-Household penetration, recurring customer rates (91%), and same-store sales growth distributions — but does **not** disclose total gross revenue per franchisee or per territory. You cannot directly determine what a Molly Maid territory generates in annual revenue from this FDD alone. The operational metrics are strong (79% of franchisees grew YoY), but the missing revenue denominator is a meaningful gap for financial modeling.

Decision Scorecard

Quick-read assessment across key buyer decision dimensions. Ratings reflect this brand's position relative to the residential cleaning cohort.

DIMENSION	RATING	SUMMARY
Entry cost burden	**MIXED**	$140K–$197K total investment. Mid-to-high for cleaning cohort. Two-part fee (franchise + territory) averages ~$56K–$64K in initial fees.
Ongoing fee burden	**MIXED**	10.4% of revenue at $300K (modelable). Marginal royalty tiers reward scale. But Local Marketing Requirement (per-TH) is excluded and adds unknown cost.
System stability	**WEAK**	Three consecutive years of contraction: -20, -17, -16 net units. System lost 53 units (-10.6%) over 2022–2024. Ceased operations (16–22/year) drive exits.
Revenue disclosure	**MIXED**	Rich operational metrics (per-cleaning revenue, recurring rates, YoY growth). But no total revenue per franchisee or territory disclosed — the most important number for financial modeling is missing.
Disclosure quality	**STRONG**	Clean filing. Light litigation (2 concluded affiliate actions). Extraction confidence high across all items.
Downside risk profile	**MIXED**	System contraction is the primary risk. 25 businesses closed during 2024 (excluded from Item 19 — survivorship bias). SPV/securitization structure adds entity complexity.
Buyer fit breadth	**STRONG**	Strongest brand recognition in cleaning. Neighborly multi-brand infrastructure. Tiered royalty rewards growth. VetFran and multi-unit discounts available.
Overall	**MIXED**	The safest brand name in the cohort paired with a shrinking system. Operational metrics are healthy, but the system is losing more units than it adds. Relative cohort position does not establish absolute profitability.

OVERALL POSTURE

Molly Maid offers the strongest brand recognition and longest track record in the residential cleaning cohort, backed by Neighborly's multi-brand franchise infrastructure. The tiered royalty structure genuinely rewards scale. But the system is contracting — losing 15–20 units per year net — and the Item 19 omits the single most important metric for a prospective buyer: total revenue per territory. You are buying into a mature, recognized brand with a shrinking footprint. Your diligence must focus on whether the contraction is pruning weak territories (healthy) or signaling systemic problems (concerning).

Buyer-Fit Profile

Best fit for

- **Brand-recognition buyer:** Molly Maid is one of the most recognized names in residential cleaning. If local marketing leverage and consumer trust matter to you, this brand has decades of awareness that newer competitors cannot match.
- **Multi-brand Neighborly investor:** If you already own or plan to own other Neighborly brands (Mr. Rooter, Mr. Electric, Mosquito Joe, etc.), the shared infrastructure, cross-selling, and multi-unit discount structure create genuine portfolio synergies.
- **Buyer seeking recurring revenue stability:** 91% recurring customer rate is the highest in the cohort. Weekly customer retention is a core operational strength of this system.
- **Scale-oriented operator who will benefit from royalty tiers:** The marginal royalty drops from 6.5% to 3% as revenue climbs through brackets. At $1M+ revenue, the blended effective rate is well below 6% — more favorable than most competitors' flat rates.

Weaker fit for

- **Buyer who needs disclosed revenue benchmarks:** The Item 19 does not disclose total revenue per franchisee or per territory. If you need disclosed revenue data to build your financial model, MaidPro, The Cleaning Authority, Merry Maids, or Two Maids all disclose absolute revenue figures.
- **Growth-oriented buyer seeking system momentum:** The system has contracted every year for three years. If you want to join a franchise that is expanding, Two Maids or The Cleaning Authority are growing; Molly Maid is not.
- **Budget-sensitive buyer:** The two-part fee structure (franchise fee + per-TH territory fee) means initial fees typically run $56K–$64K — higher than MaidPro ($45K) or The Cleaning Authority ($20K–$35K franchise fee). Total investment midpoint of $169K is above most peers.

Proceed only if

- You have talked to current franchisees about their actual annual gross revenue — the FDD will not tell you this number.
- You understand why the system is contracting and whether your proposed territory is in a growth or decline market. Ask the franchisor for territory-specific unit history.
- You have calculated your Local Marketing Requirement based on your territory's Target Household count and incorporated it into your cost model.

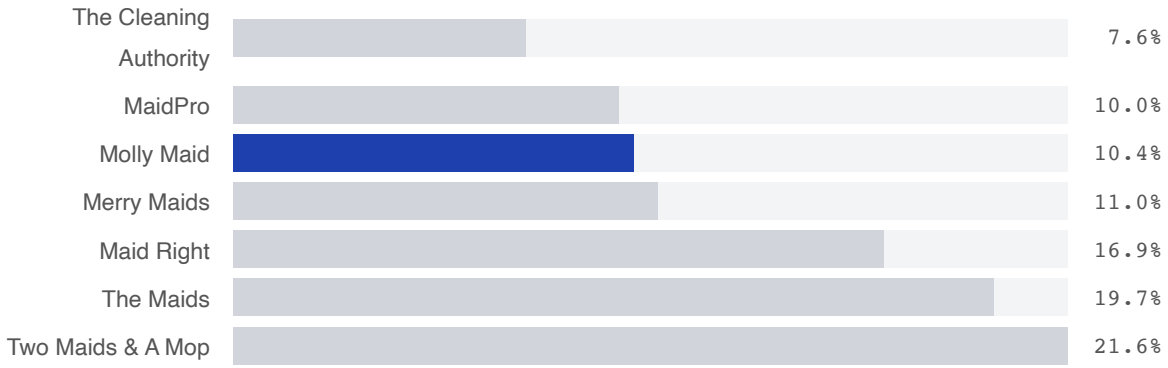
Fee Burden Analysis

Molly Maid's modelable fee burden is mid-cohort: 10.4% of revenue at $300K, dropping to 9.6% at $500K as the tiered royalty begins to bite. This is below Merry Maids (11.0%), significantly

below The Maids (19.7%) and Two Maids (21.6%), but above MaidPro (10.0%) and The Cleaning Authority (7.6%, though TCA excludes its DHH-based Local Marketing Fee). The key caveat: Molly Maid's model also excludes the Local Marketing Requirement, which is per-Target-Household and territory-size-dependent.

AT REVENUE	ROYALTY	MARKETING	TECH / OTHER	TOTAL	% OF REV	COHORT RANK
$200,000	$13,000	$4,000	$5,556	**$22,556**	11.3%	3/7
$300,000	$19,500	$6,000	$5,556	**$31,056**	10.4%	3/7
$400,000	$26,000	$8,000	$5,556	**$39,556**	9.9%	3/7
$500,000	$32,500	$10,000	$5,556	**$48,056**	9.6%	3/7

Cohort fee burden at $300K revenue



Total annual franchisor fees as a percentage of $300K gross revenue. Includes royalty, marketing, technology, and all mandatory recurring fees.

Component breakdown

- **Royalty (6.5%→3% marginal tiers):** Progressive brackets like income tax. 6.5% on first $500K, 6% on $500K–$800K, 5.5% on $800K–$1.2M, continuing down to 3% above $2.8M. At $500K revenue, effective rate is 6.5% flat (all within first tier). At $1M, blended effective rate drops to ~6.15%. The tiers are genuinely franchisee-friendly at scale — but most single-territory operators will never leave the 6.5% bracket. Roll-In franchisees get reduced Year 1 rates (3% small/medium, 2.5% large). (pp. 26, 36–37)
- **MAP Contribution (2% of Gross Sales):** National brand fund. Straightforward. Subject to ramp-up for legacy franchisees through 2025; full 2% applies to all from 2026. (pp. 26–27)
- **Technology ($463/month):** Split across two payees: $58/month to ZorWare (Qvinci, Broadly NPS, FranConnect, Office 365) + $405/month to ServiceTitan (CLEO business management software). Total $5,556/year. May increase up to 30% annually. (pp. 27–28, 35)

- **Local Marketing Requirement (per-TH — NOT modeled):** $1.00 per Target Household per year at $0–$15K weekly Gross Sales, declining to $0.15/TH at $25K+ weekly. For a 55,000 TH territory at the $1.00 rate: $55,000/year in mandatory local marketing. At the $0.50 rate ($15K–$20K weekly): $27,500/year. If you do not spend this amount, the franchisor may collect and spend on your behalf. This is a significant cost excluded from the fee burden model. (pp. 34–35)

> **What this means:** At $300K revenue, you retain ~$269K after modelable franchisor fees. At MaidPro (lowest-burden at that level), you'd keep ~$270K — nearly identical. But Molly Maid's Local Marketing Requirement could add $15K–$55K depending on territory size, making the true gap between Molly Maid and cheaper competitors substantially wider than the modelable fees suggest.

> **KEY ACCOUNTS FEE — A HIDDEN COST LAYER**
>
> Molly Maid charges up to 3% of Gross Sales on Key Account, Business Development, and call-center-dispatched work (p. 32). If a meaningful share of your revenue comes through franchisor-generated channels, this fee effectively adds to the royalty. Ask what percentage of a typical territory's revenue flows through Key Accounts.

Item 19 Interpretation

Molly Maid's Item 19 is operationally rich but financially incomplete. It provides four parts covering 197 operators (417 franchised businesses out of 448 total) for calendar year 2024. What it discloses is genuinely useful — per-cleaning revenue, territory penetration, recurring customer rates, and year-over-year growth. What it omits — total gross revenue per territory — is the single most important number for a prospective buyer's financial model.

Part I — Average gross sales per cleaning

- **System average:** $173.43 per cleaning. Median: $169.75.
- **Top quartile:** $213.76 average ($191–$263 range).
- **Bottom quartile:** $132.70 average ($90–$152 range).
- The $80 spread between top and bottom quartile per-cleaning revenue suggests meaningful pricing variation across markets — but this is a tighter distribution than revenue per territory would likely show.

Part II — Gross sales per Target Household

- **System average:** $16.23 per TH. Wide range: $2.59 to $88.13.
- Top 10% generates ~5× more revenue per TH than the system average, suggesting massive territory utilization variance.

- For a 55,000 TH territory at the system average: implied revenue of ~$893K. At the median ($15.17/TH): ~$834K. These are rough estimates — the FDD does not validate this arithmetic.

Part III — Recurring vs. occasional customers

- **91% recurring, 9% occasional** (average). The highest recurring rate in the cohort.
- 56% of operators exceed the system average recurring rate — a positive signal for business predictability.

Part IV — Same-store sales growth (2023 vs 2024)

- **79% of franchisees grew year-over-year.** Only 4% declined more than 10%.
- 22% grew more than 10%. The growth distribution is healthy — but this is same-store, not same-system. The 25 businesses that closed during 2024 are excluded.

What's missing

- **Total gross revenue per franchisee or per territory:** Not disclosed. You can attempt to triangulate from per-cleaning revenue × estimated cleans/year, or from per-TH revenue × TH count, but neither calculation is validated by the FDD.
- **Any cost data:** No COGS, no gross margin, no expense breakdowns. The Cleaning Authority and Two Maids both disclose more cost information.
- **Survivorship bias:** 25 businesses that closed in 2024 are excluded. 9 that opened, 13 mid-transfer, 2 with unreliable data, and 6 with territory changes are also excluded.

Estimating territory revenue from disclosed metrics

The FDD does not disclose total revenue, but we can attempt a rough triangulation:

Method 1 — Per-TH revenue × territory size:

- System average: $16.23/TH. For a 55,000 TH territory: ~$893K implied revenue.
- Median: $15.17/TH. Same territory: ~$834K.
- Bottom quartile average: $8.10/TH. Same territory: ~$446K.

Method 2 — Per-cleaning revenue × estimated cleanings:

- System average per cleaning: $173. If a territory performs 15 cleanings/day × 250 working days = 3,750 cleanings/year: implied revenue ~$649K. At 10 cleanings/day: ~$433K.
- These estimates are not validated by the FDD. Actual cleans/day/territory is not disclosed.

> **What this means:** Rough triangulation suggests a mid-range Molly Maid territory might generate $450K–$900K in gross revenue depending on territory size and utilization. But these are estimates built on estimates. Unlike MaidPro ($462K disclosed average), The Cleaning Authority ($1.46M

> disclosed Enterprise average), or Merry Maids ($487K Qualified Franchise average), Molly Maid gives you no confirmed revenue number. You must talk to current franchisees or get territory-specific data from the franchisor to build a credible financial model.

Buyer-Side Economics Reality Check

Important framing: This is not a profitability forecast. Molly Maid's FDD does not disclose total gross revenue per territory or any cost/expense data. The scenarios below use estimated revenue ranges triangulated from per-TH and per-cleaning metrics — these are illustrative, not FDD-sourced revenue figures. Your actual results depend on territory size, local pricing, route density, labor costs, and execution. No COGS data is available from this FDD.

SCENARIO	REVENUE	FRANCHISOR FEES	EST. COGS	REMAINING
Bottom-quartile TH estimate	$300,000	$31,056 (10.4%)	$165,000	**$103,944**
Median TH estimate	$500,000	$48,056 (9.6%)	$275,000	**$176,944**
Top-quartile TH estimate	$800,000	$48,056 (6.0%)	$440,000	**$311,944**

Revenue estimated from per-TH metrics (Part II) applied to a hypothetical 55,000 TH territory. Bottom quartile: $8.10/TH × 55K = ~$446K, rounded to $300K as conservative. Median: $15.17/TH × 55K = ~$834K, rounded to $500K as midpoint. Top quartile: $32.60/TH × 55K = ~$1.79M, capped at $800K for single-territory realism. COGS estimated at 55% based on cleaning industry norms (no FDD cost data available). 'Remaining' must cover all operating expenses, Local Marketing Requirement, and owner draw. These are illustrative scenarios, not disclosed figures.

Investment Breakdown

Mid-to-high cohort entry cost: $139,900–$197,200. The two-part initial fee structure ($14,900 franchise fee + ~$45,000–$70,000 territory fee based on $1.00 per Target Household) means your upfront fees scale with territory size. A standard 55,000–70,000 TH territory will cost $70K–$85K in combined initial fees. Multiple discount programs exist: VetFran (20% off territory fee), Roll-In (5–50% based on existing business sales), Multi-Unit (5–20% based on tenure). (pp. 23–26)

CATEGORY	LOW	HIGH
Initial Franchise Fee	$14,900	$14,900
Territory Fee	$45,000	$70,000
Initial Startup Package	$8,000	$9,000
Software Enrollment and Training Fee	$1,500	$1,500
Auto Lease Deposit and Lease Expense	$3,900	$5,500
Computer Hardware	$2,200	$4,500
Leasehold Improvements	$1,000	$5,000
Real Estate, Utility Deposits and Three Months Rent	$4,000	$7,000
Furniture, Fixtures and Equipment	$2,500	$3,500
Permits and Licenses	$100	$1,000
Insurance Deposit and Three Months Insurance Expense	$2,800	$5,300
Training Expenses for Travel, Food and Lodging	$4,000	$5,000
Professional Fees	$0	$5,000
Additional Funds - 3 Months	$50,000	$60,000
Total	**$139,900**	**$197,200**

What to know about the major line items

- **Territory Fee ($45,000–$70,000 standard / $30,000–$45,000 mid-size):** $1.00 per Target Household. This is the primary variable — your territory size drives your initial cost. Average paid in 2024: ~$56K. Franchise fee ($14,900) is waived for expansion of existing compliant franchisees. (pp. 23–25)
- **Additional Funds — 3 months ($50,000–$60,000):** The largest line item. Covers payroll, marketing, gas, auto maintenance, internet, general business. Does not include owner salary or draw. At the low end, this may be tight for a territory still ramping revenue. (p. 39)
- **Auto lease + computer hardware ($6,100–$10,000):** Minimum 2 vehicles required (one for estimates, one for team). New vehicle purchase runs $23,500–$26,500 — substantially above the lease deposit shown in Item 7. (p. 39)
- **Software enrollment ($1,500 one-time):** Paid to ZorWare. In addition to the ongoing $463/month technology fees. (p. 39)

> **What this means:** Plan for $169K at the midpoint. The territory fee structure means larger territories cost proportionally more to enter — and the Local Marketing Requirement also scales with territory size. A buyer targeting a large 70,000 TH territory should expect $85K+ in initial fees alone, plus ongoing local marketing costs of $35K–$70K/year depending on revenue level. The economics favor territories large enough to generate scale but small enough that per-TH costs remain manageable.

System Health

Molly Maid is the largest residential cleaning franchise in this cohort — and it is contracting. The system has shrunk every year for three consecutive years: 501 to 481 to 464 to 448 outlets. That is 53 net lost units (-10.6%). New openings averaged only 7 per year (5, 7, 9) against 25–38 annual exits. This is a mature system that is losing more units than it replaces.

YEAR	OPENED	CLOSED	NET	END COUNT
2022	5	25	−20	481
2023	7	24	−17	464
2024	9	25	−16	448

Exit composition

The exit pattern shifted over the three-year window:

- **2022:** 8 terminations, 1 non-renewal, 16 ceased operations, 20 transfers. Total exits: 45.
- **2023:** 2 terminations, 0 non-renewals, 22 ceased operations, 15 transfers. Total exits: 39.
- **2024:** 6 terminations, 2 non-renewals, 17 ceased operations, 13 transfers. Total exits: 38.

Terminations declined, but "ceased operations — other reasons" has been the dominant exit category every year (16, 22, 17). The FDD notes that this column includes transfers to existing franchisees, territory consolidations, and abandonments — making it difficult to distinguish healthy portfolio management from business failures. (pp. 78–85)

Turnover rate in context

Overall turnover (all exits ÷ start-of-year count): 9.0% (2022), 8.1% (2023), 8.2% (2024). This is mid-range for the cleaning cohort — well below Merry Maids (14.1%) and Maid Right (38.6%), but above The Maids (3.9%) and Two Maids (5.1%). The concerning pattern is not the rate itself but the inability to offset exits with new openings. Only 21 new franchises opened across the entire three-year window.

> **What this means:** This is not a system in crisis — the turnover rate is moderate and same-store sales growth is healthy (79% grew YoY). But it is a system that has stopped growing. For a buyer, the

> question is whether you are buying into a mature brand with stable territories or a declining system that will have fewer peers, less brand momentum, and potentially less franchisor investment in innovation over time. The Neighborly/KKR infrastructure provides a floor — this brand is unlikely to be abandoned — but growth is not coming from new franchise sales.

No company-owned outlets

Zero company-owned locations. All 448 outlets are franchised. The franchisor is not competing with its franchisees in any market.

Risk Signals

System contraction is the primary structural risk

Three consecutive years of net unit loss with only 21 new openings across the period. The system shrank 10.6% while same-store sales grew for 79% of franchisees. This divergence — healthy existing operators but no new ones joining — suggests either the franchise offering is not competitive for new buyers, or the franchisor is prioritizing territory consolidation over expansion. Either way, the trajectory matters for long-term brand investment and support resources. (pp. 78–85)

SPV securitization structure

Molly Maid SPV LLC is a special-purpose vehicle within the Neighborly/KKR securitization chain. All franchise agreements were transferred from the predecessor entity to the SPV in March 2021. This adds entity complexity — your franchise agreement is with a special-purpose entity, not the operating company directly. In practice, Neighborly manages operations, but the legal structure matters if the securitization is restructured or sold. (pp. 1–2)

Litigation: effectively clean

Two disclosed actions — both concluded, both involving predecessor or affiliate entities (Kansas consumer protection action against Molly Maid, Inc. in 2010, settled for $50K; California regulatory action against Window Genie affiliate in 2017, $5K penalty). No actions involving the current Molly Maid SPV LLC franchisor. Clean litigation profile. (pp. 21–22)

Item 19 disclosure gap

The omission of total revenue per territory is itself a risk factor — not because it suggests bad economics, but because it forces you to build your financial model on triangulated estimates rather than disclosed data. Competitors who disclose revenue (MaidPro, The Cleaning Authority, Merry Maids, Two Maids) give their prospective buyers a material advantage in pre-purchase analysis.

Peer Context

Molly Maid is the largest system in the cohort and the most recognized brand. It offers a competitive fee structure (10.4% modelable at $300K), a tiered royalty that rewards growth, and Neighborly's multi-brand infrastructure. But it is the only cohort member combining system contraction with a missing revenue disclosure — two features that make pre-purchase analysis harder than at most peers.

Closest comparison: Merry Maids. Similar scale (802 units), similar age (46 years), similar system contraction (worse — Merry Maids lost 187 units over 3 years). Merry Maids discloses total revenue ($487K average for Qualified Franchises) while Molly Maid does not. Merry Maids' fee burden is slightly higher (11.0% vs 10.4% at $300K). If revenue disclosure matters to you, Merry Maids provides more to work with — but its contraction is more severe.

Sharpest contrast: Two Maids & A Mop. Fastest-growing system (+56.5% over 3 years) vs Molly Maid's contraction (-10.6%). Two Maids charges significantly higher fees (21.6% at $300K) but provides the richest disclosure in the cohort. If you are choosing between brand recognition and growth momentum, Molly Maid and Two Maids are opposite bets.

Lower-cost alternative: MaidPro. Simpler fee structure (10.0% at $300K), lower entry cost ($110K–$159K), disclosed revenue ($462K average), and a stabilizing system. If Molly Maid's brand premium and Neighborly ecosystem do not justify the higher entry cost and missing revenue disclosure, MaidPro is the cleaner comparison.

METRIC	MAID RIGHT	MAIDPRO	MERRY MAIDS	MOLLY MAID	THE CLEANING AUTHORITY	THE MAIDS	TW MAIDS A MC
System size	35	237	802	448	233	338	1
Investment range	$147K–$218K	$109K–$158K	$126K–$170K	$139K–$197K	$92K–$147K	$117K–$141K	$93 $14
Fee burden at $300K	$50,780	$30,000	$32,988	$31,056	$22,902	$59,130	$64,8
% of revenue	16.9%	10.0%	11.0%	10.4%	7.6%	19.7%	21.
3-year net growth	+11	-9	-187	-53	+24	-13	+
Recent attrition	34.1%	3.0%	10.2%	5.4%	1.8%	2.9%	5.
Royalty rate	6.0%	6.0%	7.0%	6.5–3.0%	6.0–4.0%	6.9–3.9%	7. 4.

Decision overlay

Lowest modelable fee burden	MaidPro — 10.0% at $300K with the simplest structure in the cohort: flat 6% royalty + 2% Brand Fund + $500/mo tech. No territory-size-dependent fees.
Richest revenue disclosure	The Cleaning Authority — Per-territory gross revenue ($1.46M average Enterprise), COGS breakdown, price per clean, and customer metrics. Most data for financial modeling.
Best profitability disclosure	The Maids — Only brand disclosing company-owned net margin (15.5%). 97 company-owned offices with $1.18M system-wide average.
Strongest growth trajectory	Two Maids — 56.5% system growth over 3 years (+7, +19, +26 net units). Only brand with sustained, accelerating expansion.
Lowest franchise turnover	The Cleaning Authority — 4.1% in 2024, down from 10.6%. Zero terminations in 2024 across 236-outlet system.
Strongest brand recognition	Molly Maid — 448 outlets, franchising since 1980. Longest track record and Neighborly multi-brand ecosystem.
Highest regulatory risk	Maid Right — CEO barred in California, 6 state regulatory actions, 38.6% turnover, financial condition warnings. Smallest system (35 units).

Discovery Day Diligence Script

These questions are derived from specific findings in the Molly Maid 2025 FDD. Each includes context on why it matters and what to listen for.

1. The Item 19 discloses per-cleaning revenue and per-TH metrics but not total revenue per territory. What is the average and median annual gross revenue for a single-territory Molly Maid franchisee?

Item 19, Parts I–IV, pp. 74–78. 197 operators, 417 businesses. No total revenue figure provided.

2. The system has contracted from 501 to 448 outlets over three years. What is driving the net decline — is the franchisor pruning underperforming territories, or are franchisees choosing to exit?

Item 20, pp. 78–85. 'Ceased operations — other reasons' is the largest exit category (16, 22, 17 per year) but includes transfers to existing franchisees and territory consolidations.

---

3. The Local Marketing Requirement scales from $1.00/TH to $0.15/TH based on weekly Gross Sales. For the territory I am considering, what is the estimated annual Local Marketing Requirement?

Item 6, pp. 34–35. Territory-size-dependent marketing cost excluded from fee burden model.

---

4. The Key Accounts/Management Fee is up to 3% of Gross Sales on franchisor-generated business. What percentage of a typical territory's revenue comes through Key Accounts or call-center-dispatched leads?

Item 6, pp. 32–33. This fee is layered on top of the royalty for franchisor-sourced revenue.

---

5. 79% of franchisees grew same-store sales in 2024, but the system lost 16 net units. How do you reconcile healthy same-store performance with system contraction?

Item 19 Part IV (pp. 77–78) vs Item 20 (pp. 78–85).

---

6. The technology fee ($463/month) may increase up to 30% annually. What has the actual year-over-year increase been for the past 3 years?

Item 6, pp. 27–28, 35. $5,556/year currently, split between ZorWare and ServiceTitan.

Source & Methodology

Source document: Molly Maid 2025 Franchise Disclosure Document, filed with the Wisconsin Department of Financial Institutions. 377-page regulator-source PDF. SHA-256:
`44d5c311e25ac0883a9f3ab5b3377d7abbeef3ba87bacdea1d3bea31c00ca220`

Extraction: Structured data extraction using pdfplumber with manual review. Field-level provenance recorded (source year, state, page number, item reference). Extraction confidence: high (3+ fields spot-checked against source).

Fee modeling: Year 5 assumptions, single territory, 1 owner + 1 technician. Revenue distributed evenly across the year. All mandatory fees enforced. See fee_modeling_framework.md for full methodology.

Economics scenarios: Revenue estimates drawn from Item 19 data. COGS ratio is brand-specific (derived from available company-owned P&L data; see Economics section for derivation and assumptions). Scenarios are illustrative, not predictive. Operating costs beyond franchisor fees and COGS are not estimated — the buyer must validate these independently.

Peer comparison: Same methodology applied to all 7 brands in this cohort (Maid Right, MaidPro, Merry Maids, Molly Maid, The Cleaning Authority, The Maids, Two Maids & A Mop). All from 2025 FDDs filed with Wisconsin DFI.

Disclaimer: This report is not legal advice, investment advice, or a recommendation to buy or avoid this franchise. It is a structured analysis of publicly available regulatory filings. The buyer should read the actual FDD, consult a franchise attorney, and conduct their own due diligence before making any investment decision. Economics scenarios are illustrative frameworks for buyer-side thinking — not profitability forecasts.
